Researchers from the University of Queensland are conducting research into parenting of children with type 1 diabetes. We are seeking parents of children and adolescents with type 1 diabetes to participate. Participation in this project will involve completing a survey, and a telephone interview.

The telephone interview includes questions on diabetes management tasks which parents of children with type 1 diabetes experience difficulty with, how parents think and feel about parenting a child with type 1 diabetes, and their preferences for assessing services to assist in dealing with these behaviours and tasks.

If you are interested in participating in this research or would like further information please email clin.roslyn.pay@uq.edu.au
