Don’t forget other school holiday fun – visit the shop for a great selection of craft, toys, books, sporting gear and more.

**News from Year 3 & 4**

In Science, the year 3/4 students have been busy learning about Weather. We have been discussing The Water Cycle and clouds. We have conducted an experiment about rainbow rain. We floated a shaving cream cloud on top of a clear cup of warm water and then placed droplets of food colouring onto the cloud. When the cloud got too heavy, the rainbow rain fell through the cloud into the water. There were squeals of delight when the children observed the rain coming through. We also went on a visit to the high school science lab to complete some experiments on The Water Cycle with Mr Mantinaos.

We also enjoyed the ‘JUMP OFF’ for Jump Rope for Heart. Many of the children have collected sponsors and bought in their money. The children have really improved their skipping skills over the last few weeks.
